Minutes of NMI3 SE JRA (WP21) meeting PSI, Zurich 30/03/09

Attendees:

Dirk Wallacher (DW), HZB Eddy Lelièvre-Berna (EL), ILL Frédéric Marchal, ILL Claude Payre, ILL Jean-Luc Laborier, ILL Paul Martin, ILL

Jean-Michel Mignot (JM),

Zoe Bowden (ZB), ISIS Dennis Cowdery, ISIS Beth Evans, ISIS Mark Kibble, ISIS Oleg Kirichek (OK),

ISIS

Jurgen Peters, FRM-II

Marcus Zolliker, PSI

Helmut Schober (HS), ILL

Erik Knudsen (EK), RISØ-DTU (Confidentiality agreement 300309.pdf)

Agenda: SE JRA Meeting Agenda 300309.doc

| | COMMENT | MADE BY: |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| | Introductions to the Tasks | БТ. |
| | High Pressure Task | |
| 1 | Oleg's presentation: High Pressure 300309.pdf | |
| | The interpretation of the PED regulations regarding the pressure cells produced is a concern. | OK |
| 2 | There are also additional rules concerning high pressure for nuclear applications at reactor facilities. | EL |
| 3 | The pressure cells produced need to conform to the regulations that apply to all facilities so that they can be shared. | |
| 4 | An agreement concerning the interpretation of the PED regarding small volume pressure vessels would be seen as a good deliverable by the EC. | HS |
| 5 | Under Danish regulations as soon as you pass chemicals to a friend in another lab you become a 'supplier'. | EK |
| 6 | Levitation Furnace Task Eddy's presentation: Levitation furnace 300309.pdf | |
| | Gas Adsorption Task | |
| 7 | Dirk's presentation: Gas Adsorption 300309.pdf | |
| | Discussion of Tasks – delivery | |
| 3 | Responsibility of task deliverables shared out - JRA timeplan 310309.xls. | |
| | High Pressure Task | |
| 9 | Reports for Inert Gas and Hydrogen technology and research (D.21.2.1.1 & D.21.2.2.1) – Oleg to collate all relevant information from partners. | ZB |
| 10 | We need to share H ₂ knowledge – perhaps we should organise a meeting and invite expert speakers? | OK/DV |
| 11 | LLB are welcome to send their pressure cells to ISIS for testing in safety bunker. ISIS will support LLB in the design and testing of the inert gas cells. | ZB |
| 12 | ILL have a 10 kbar gas handling system in manufacture which may also be used for testing. | EL |

| | The CNRS 10 kbar valve prototype has been tested with good results. | |
|----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| | Website/Sharing knowledge | |
| 13 | We will have a section within the NMI3 FP7 website for our JRA. We should upload meeting minutes, reports, publications etc. | EL |
| 14 | We must protect access to sensitive information. We could have two levels of access: open access (containing general information, publication abstracts etc) and password protected area (designs, drawings etc) | JM |
| 15 | Publications – should be in pdf file format and protected by a password given only to those at facilities who have access to the relevant electronic journal. | EL |
| 16 | Change the website access password every 6 months to maintain security. | ZB |
| 17 | Website should be maintained after the JRA is finished as a means of sharing SE information between facilities | EL |
| 18 19 20 | Should we share information with SNS, JPARC, ANSTO? Good experience of sharing in past JRA's Talk to Lou Santodonato about the at JRA at ICNS | ZB EL EL, OK |
| | General | |
| 21 | Design review milestones/deliverables: can take place within our JRA meetings – the meeting minutes can be submitted as evidence the milestone has been completed. | EL |
| 22 | Reminder about booking time to the JRA (but do not include annual leave!) | ZB |
| | Next meetings | |
| 23 24 | Next meeting should be held at the LLB. Preferably in an ISIS shutdown (between Oct 23 – Nov 23 2009) - last week in October if possible. | All ZB |
| 25 | Hold a JRA meeting at the SE Workshop in Munich, end September 2010 | EL |
