

## **Minutes of NMI3 PN JRA (WP19) meeting**

**5 December 2012 in Garching**

### **Attendees:**

1. A.Ioffe
2. E.Babcock
3. S.Longeville
4. A. van Well
5. E.Jericha
6. A.Gukassov
7. M.Monkenbusch
8. R.Georgii
9. G.Badurek
10. W.Haüssler
11. K.Lefmann
12. M.Forster

### Agenda:

1. Welcome
  2. Discussions of tasks
  3. Management issues
- 
1. The PN JRA coordinator A.Ioffe welcomed participants.
  2. Participants described the final status of the tasks they are responsible for. No problems have been mentioned. Participants pointed out that the JRA provided a very useful platform for scientific cooperation. Regular scientific exchange allowed for a significant synergy effect allowing both to avoid multiplication of jobs and to profit from developments made by partners. A few new collaborations have been emerged, e.g between FZJ and LLB on neutron polarizers, when results obtained

by FZJ allowed to make a decision on construction of the polarization analyzer for a new diffractometer at LLB; the design of resonator made in TU Vienna has been used by FZJ for construction of new spin turners.

3. Participants discussed issues related to the final reporting. NMI3 Manager M.Forster explained some practical issue of related to the writing of the final report
